Dear Parents,

We are excited that you are researching Oswegatchie as an option for your child this summer. We know how valuable camp can be for your child's development. Oswegatchie strives to not only create a learning environment, but a safe one as well. The program itself is designed to meet the needs of teen aged youth.

As you compare camps, you will notice a large difference between our cost and many other camps that offer similar activities. The average cost for a week at Oswegatchie camp is \$280, while comparable programs cost \$500. There is no extra cost for the ropes course, horses, or waterskiing. Our price includes all things except for the seaplane and the camp store. It is common to associate value with cost, but when it comes to understanding Oswegatchie, what we offer is far more valuable than what you will pay.

Our management staff works hard to reinvest each dollar earned. We put our resources back into facility and program to make continual improvements. We stay committed to our past, but keep offering more each year for your child. We have been able to continually improve while keeping our costs low. If you choose to send your child to our camp, you are taking advantage of decades of effort. The end result is a unique experience at a remarkable low cost to you.

If there is anything additional Oswegatchie can do to help you with your decision, please let us know. We are here to make your decision more complete.

Sincerely,

Bill Waite
Program Director
